

GENIE CANVAS

COLLAPSIBLE CANVASES

Packing Instructions

- 1 Place canvas on clean, flat area with painted side down.
- 2 Remove Center bars by sliding plastic sleeve away from hinge and lifting out of canvas.
- 3 Remove End bars by detaching velcro and sliding out of slots in side bars.
- 4 Slide inner tube over one side bar until velcro bits on tube align with velcro on canvas. Prepare to roll with painted side down.

Roll canvas until about 1 foot remains. Be watchful that the canvas rolls straight and periodically check that the ends of the canvas remain tight to prevent buckling. Place the foam sheet so folded side of foam overlaps side bar, protecting the canvas from the wooden bar. Roll up remaining bit of canvas.
- 5 Place End bars, Center bars and instruction packet inside the inner tube. Insert foam plugs to keep bars inside the tube during shipping.
- 6 Slide rolled up canvas inside of plastic bag, ensuring that rolling has remained tight and straight.
- 7 Insert canvas in outer tube and insert end cap.
